My first visit to Dr. Williams was very pleasant and very detail about my dental issues and what it would take to make my mouth well again. I have dry mouth and have had Chemo and radiation so all of that has taken a toll on my teeth and caps. He wrote a detailed plan and cost analysis of my treatment. I am going to have sedation dentistry and that I am excited. I will let you all know how it works out. I'm expecting only the best and would be so disappointed if it's not. So far, I would recommend given him a try to see if he is a fit for you.

As always, my experience at Dr. Williamson's office was delightful. The entire staff is friendly and extremely competent. Normally, one doesn't look forward to having one's teeth cleaned, but Dr. Williamson's staff is professional and thorough.

Dr. Williamson and his staff are amazing! Friendly, never rushed, trustworthy, and competent. I drive all the way from Spring Branch because I've never had a dentist I trust more! Highly recommend!

I am a highly reluctant patient for any medical procedure and took a long time to find a dentist I felt I would be comfortable. Dr. Mark Williamson and his wonder staff were very accomodating to my fears and explained everything really well and took great care of me during my procedures! Highly Recommend!

Best dentist office I have ever went to because Dr. Williamson and his entire staff are professional, friendly and provide excellent oral care. I drive an hour, past a lot of dentist offices, for my dental care. Highly recommended for understate my opinion of this dental practice.

For someone who is very nervous in a dental chair, or even visiting the dentist, my experience with Dr. Williamson and his staff has been more than pleasant. Not only are the concerned for your comfort, they truly ask all of the right questions to keep you comfortable and less "white knuckled." They go over thoroughly their dental plan, keeping you informed of all procedures and associated costs. Finally found my forever dentist!

I've been told that I have dental PTSD, I do have pretty high dental anxiety. I needed dental surgery and Dr Williamson worked out a plan with me. On the day of surgery we agreed to IV sedation. They started with gas to help me relax so that I didn't even feel the IV insertion. Afterwards I had no memory of the procedure, exactly what I wanted. Everyone in the office is like my best friend. They are an awesome team. Recommend them to everyone.

ALL of the staff and Dr. Williamson are FANTASTIC! My daughter just recently had major dental surgery with Dr. Williamson. She has a lot of dental anxiety and both Dr. Williamson and his staff went out of their way to help alleviate any concerns she had and made her feel at ease. We are so thankful for them and would highly recommend this dental office!!!

Dental Hygienist Judy was so very patient and just perfect to help me through the process of x-rays and exams. She was very thorough in explaining what I needed done. She definitely put me at ease and her ever so calm and gentle personality made my decision of going there for my dental needs the right one! Dr Staffel was very kind and soft spoken but nonetheless a wonderful man. I would highly recommend this team to friends and family.

Even though i have moved 200 miles away from Dr Staffel and Dr McLin's office, i travel back to have all my dental work and cleaning done by them. The reason is simple. They stay on top of the latest, best, and safest procedures and have the most advanced equipment. Not to mention they have the friendliest staff who are genuinely concerned about their patients and make sure you are comfortable and painfree during your visit. Five stars isnt enough. They are the best.
